

# Creating Places for People

A photograph of a modern residential complex. In the foreground, a paved walkway curves through a lush, green landscape filled with various plants and shrubs. A man in a dark suit and a woman in a light-colored dress are walking away from the camera on the path. To the right, a bronze sculpture of a seated figure is visible. In the background, a modern building with large glass windows and a red roofline is partially visible, surrounded by tall trees.

From general to particular: how are centres of gravity created in residential complexes and what is the recipe for creating a comfortable environment?
